

PACIFIC NORTHWEST MIDSTREAM HVAC AND WATER HEATING PROGRAM

2024 Rebates and Minimum Efficiencies: Residential and Small Commercial HVAC

Page 1 of 1

The Pacific Northwest Midstream HVAC and Water Heating Program is provided by Puget Sound Energy, Seattle City Light, and Snohomish County Public Utility District (PUD). The table below outlines minimum efficiency requirements for heat pumps under 5.4 tons with details as follows:

- Eligibility is listed by AHRI rated values (SEER/HSPF requirements in Table 1 and SEER2/HSPF2 requirements in Table 2) and will be based on sales date and availability of rated values data in AHRI.
- All heat pump ratings are AHRI rated values.
- Incentives are listed as \$/outdoor system.
- Customers purchasing qualifying heat pump systems must have a valid electric service account with Puget Sound Energy, Seattle City Light, or Snohomish County PUD.

Limit 1 heat pump outdoor system per residence and no limit for commercial customers. Sales made on or after January 1, 2024, as determined by the date on the distributor invoice to the installer, are eligible for the Program. Please reach out to the Program Implementer with any questions about limits and qualifying installations.

Table 1: SEER/HSPF rated residential and small commercial air-source heat pumps (<5.4 tons)¹

Equipment type	Project type	Tier	SEER (minimum)	HSPF (minimum)	Customer pass-through rebate ² (\$/outdoor system)
Mini-/multi-split heat pump < 65 kBtuh (< 5.4 tons) ³	Retrofit and new construction	1	16.0	9.5	\$400
		2	16.0	11.0	\$600
Traditional heat pump < 65 kBtuh (< 5.4 tons)	Retrofit only	1	16.0	9.0	\$300
	Retrofit and new construction	2	16.0	10.0	\$500

Table 2: SEER2/HSPF2 rated residential and small commercial air-source heat pumps (<5.4 tons)⁴

Equipment type	Project type	Tier	SEER2	HSPF2	Customer pass-through rebate ² (\$/outdoor system)
Air source heat pump < 65 kBtuh ⁵	Retrofit or new construction	1	15.2	8.1	\$300
		2	15.2	8.5	\$400
		3	16.0	9.5	\$600

¹SEER/HSPF table is effective for equipment that only has SEER/HSPF rating in the AHRI directory.

²Pass-through rebates are very strongly recommended to be passed along to the end-use customer and displayed as a line item or otherwise identified on the invoice.

³To qualify as a mini- or multi-split heat pump, products must be listed in the AHRI database as Variable Speed Mini-Split or Multi-Split heat pumps. These products may be referred to as Ductless Heat Pumps in the marketplace.

⁴SEER2/HSPF2 table is effective for equipment that has only a SEER2/HSPF2 or dual rating in the AHRI directory.

⁵Qualification of air source heat pumps for this program does not assure qualification for Inflation Reduction Act (IRA) incentives.

PACIFIC NORTHWEST MIDSTREAM HVAC AND WATER HEATING PROGRAM

2024 Rebates and Minimum Efficiencies: Commercial and Residential Water Heaters

Page 1 of 1

The Pacific Northwest Midstream HVAC and Water Heating Program is provided by Puget Sound Energy, Seattle City Light, and Snohomish County Public Utility District (PUD). The table below outlines minimum efficiency requirements for hybrid heat pump water heater (HPWH) rebates by Seattle City Light and Snohomish County PUD with details as follows:

- Eligibility is listed by building and project type.
- Incentives for hybrid heat pump water heaters are listed as \$/unit.
- Customers purchasing qualifying hybrid heat pump water heaters must have a valid electric service account with Seattle City Light or Snohomish County PUD. HPWH rebates are not available to PSE customers through this program.

Limit 1 hybrid heat pump water heater per residence and no limit for commercial customers. Sales made on or after January 1, 2024, as determined by the date on the distributor invoice to the installer, are eligible for the Program. Please reach out to Program Implementer with any questions about limits and qualifying installations.

Commercial and residential hybrid heat pump water heaters ¹					
Equipment type	Building type	Project type	Qualifying models ²	Customer pass-through rebate ³ (\$/unit)	Contractor spiff ⁴ (\$/unit)
Hybrid heat pump water heater < 120 gallons ⁵	Commercial	Retrofit only	Any NEEA Tier	\$600	\$100
	Residential ⁶	Retrofit only	NEEA Tier 3 or 4	\$500	\$100

¹ May be referred to as electric hybrid water heaters in the marketplace.

² See the [Northwest Energy Efficiency Alliance \(NEEA\) residential qualifying product list online](#).

³ Pass-through rebates are very strongly recommended to be passed along to the end-use customer and displayed as a line item or otherwise identified on the invoice.

⁴ Contractor spiff will be passed through by the distributor to the contractor as a line item on the invoice.

⁵ Equipment of greater than 120 gallon capacity and/or with 6 kW of input power or less may qualify for commercial installations. Please contact the Program Implementer for more information.

⁶ Qualification of hybrid heat pump water heaters for this program does not assure qualification for Inflation Reduction Act (IRA) incentives.

PACIFIC NORTHWEST MIDSTREAM HVAC AND WATER HEATING PROGRAM

2024 Rebates and Minimum Efficiencies: Residential Water Heaters

Page 1 of 1

The Pacific Northwest Midstream HVAC and Water Heating Program is provided by Puget Sound Energy, Seattle City Light, and Snohomish County Public Utility District (PUD). The table below outlines minimum efficiency requirements for commercial and residential gas water heater rebates offered by Puget Sound Energy with details as follows:

- Eligibility is listed by building and project type.
- Equipment capacity is AHRI rated capacity or capacity at AHRI rating conditions for units without an AHRI rating.
- Customers purchasing qualifying gas water heaters must have a valid gas service account with Puget Sound Energy.
- Rebates are not available to Seattle City Light and Snohomish County PUD customers.

Limit 1 condensing or non-condensing storage gas water heater per residence. Sales made on or after January 1, 2024, are eligible for the Program. Please reach out to Program Implementer with any questions.

Residential water heaters					
Equipment type	Building type	Project type	Size Category	Minimum UEF ¹	Customer pass-through rebate ² (\$/unit)
Condensing or non-condensing storage gas water heaters	Residential	Retrofit	≥ 20 gallons and ≤ 55 gallons	Uniform Energy Factor ≥ 0.67	\$135

¹ Values are AHRI rated efficiencies.

² Pass-through rebates are very strongly recommended to be passed along to the end-use customer and displayed as a line item or otherwise identified on the invoice.

PACIFIC NORTHWEST MIDSTREAM HVAC AND WATER HEATING PROGRAM

2024 Rebates and Minimum Efficiencies: Residential Space Heating Boilers

Page 1 of 1

The Pacific Northwest Midstream HVAC and Water Heating Program is provided by Puget Sound Energy, Seattle City Light, and Snohomish County Public Utility District (PUD). The table below outlines minimum efficiency requirements for residential space heating boilers rebates offered by Puget Sound Energy with details as follows:

- Incentives for residential space heating boilers are listed as \$/unit.
- Eligibility is listed by AHRI rated AFUE values.
- Equipment capacity is AHRI rated capacity.
- Customers purchasing qualifying gas space heat boilers must have a valid gas residential service account with Puget Sound Energy.
- Rebates are not available to Seattle City Light and Snohomish County PUD customers.

Limit 1 condensing gas boiler per residence. Sales made on or after January 1, 2024, are eligible for the Program. Please reach out to Program Implementer with any questions.

Residential space heating boilers

Equipment type	Building type	Size category	Project type	AFUE	Customer pass-through rebate ¹ (\$/unit)
Condensing gas boiler	Residential	≤ 300,000 Mbtuh	Retrofit	≥ 95%	\$450

¹ Pass-through rebates are very strongly recommended to be passed along to the end-use customer and displayed as a line item or otherwise identified on the invoice.

PACIFIC NORTHWEST MIDSTREAM HVAC AND WATER HEATING PROGRAM

2024 Rebates and Minimum Efficiencies: Commercial and Residential Pumps

Page 1 of 1

The Pacific Northwest Midstream HVAC and Water Heating Program is provided by Puget Sound Energy, Seattle City Light, and Snohomish County Public Utility District (PUD). The table below outlines minimum efficiency requirements for commercial and residential pump rebates offered by Seattle City Light, with details as follows:

- Eligibility is listed by equipment type and size category.
- Size categories refer to rated rather than nominal horsepower (hp).
- ECM circulator pump incentives are listed as \$/unit.
- Customers purchasing qualifying equipment must have a valid electric service account with Seattle City Light. ECM circulator pump rebates are not available to PSE or Snohomish County PUD customers through this program.

Sales made on or after January 1, 2024, are eligible for the ECM circulator pump rebates below. Please reach out to the Program Implementer with any questions about qualifying installations.

Commercial ECM circulator pumps

Equipment type	Subcategory	Size category	Customer pass-through rebate ¹ (\$/unit)
ECM circulator pump	Hydronic heating	≤ 1/6 hp	\$100
		> 1/6 and ≤ 3/4 hp	\$200
		> 3/4 and ≤ 3.5 hp	\$400
ECM circulator pump	Service hot water	≤ 1/6 hp	\$100
		> 1/6 and ≤ 3/4 hp	\$200
		> 3/4 and ≤ 3.5 hp	\$400

Residential ECM circulator pumps

Equipment type	Subcategory	Size category	Customer pass-through rebate ¹ (\$/unit)
ECM circulator pump	Hydronic heating	Any pump size	\$100
ECM circulator pump	Service hot water	Any pump size	\$100

¹ Pass-through rebates are very strongly recommended to be passed along to the end-use customer and displayed as a line item or otherwise identified on the invoice.
