

Help customers save. Get rewarded.

Earn a sales incentive while saving your customers up to \$1,500 per unit on commercial foodservice equipment.

The Rocky Mountain Power Foodservice Instant Rebates program gives your eligible customers instant rebates at the point of sale on high-efficiency electric commercial foodservice equipment, while giving you a sales incentive.

Benefits:

1. Gain a competitive advantage by giving a rebate that motivates customers to purchase efficient, high-margin equipment.
2. Increase customer satisfaction by providing an instant rebate on the spot, with no paperwork for the customer.
3. Receive a sales incentive for each high-efficiency product discounted at the point-of sale.
4. Streamline applications through an online rebate processing system and receive a rebate repayment within two weeks of application approval.

Program Eligibility Requirements:

- Dealers who sell commercial foodservice equipment to qualified customers are eligible for this program.
- Dealers must be an approved Watts[®]Smart[®] Business Trade Ally to participate.
- Rebated equipment must be installed in an existing, non-residential location that receives electric service from Rocky Mountain Power. If the project is a [multifamily project](#) or is participating in the [Whole Building new construction and major renovation program](#), it does not qualify for midstream incentives.

Required Information:

- ☒ Qualifying installation address
- ☒ Business name, purchaser name and contact information
- ☒ Salesperson and branch name
- ☒ Invoice date and number, estimated installation date
- ☒ Product sold
- ☒ Quantity
- ☒ Rated exhaust horsepower- for demand controlled kitchen ventilation only
- ☒ Building type
- ☒ Total project equipment cost
- ☒ Project type (confirm project is retrofit)

Qualifying Equipment:

Many makes and models of electric foodservice equipment qualify for rebates. Efficiency requirements for each equipment are listed in the incentive table, found in the Documents section of the online rebate processing system "Iris".
